CYBR C140: NETWORK TECHNOLOGIES WITH SPLUNK

Item	Value

Course Description

This course introduces students to foundational Splunk Security Information and Event Management concepts. Students learn search basics, log interpretation, and triage techniques required for entry-level Security Operation Center analyst and Information Security Analyst roles. Includes hands-on labs and dashboard creation. This course is aligned with industry best practices and certification objectives such as the Splunk Core Certified User. ADVISORY: CYBR C100. Transfer Credit: CSU.
