Course Description

This course introduces students to the subject of Health Care Management and prepares them to start their career in that field. It covers all aspects of management such as communication, coordination, leadership, planning, and decision making. In addition, it also covers organization design, staffing, and budgeting within the context of health care management and administration. Enrollment Limitation: HLTH C121; students who complete MGMT C161 may not enroll in or receive credit for HLTH C121. Transfer Credit: CSU.

Course Level Student Learning Outcome(s)

1. Identify the major functions and responsibilities of a health care manager and apply the knowledge to real life experience in the health care arena.
2. Given a specific real life health care scenario, analyze the data and formulate a plan to deal with different aspects of the situation based on the knowledge gained in the course.

Course Objectives

- 1. Understand how the US health care system has evolved over time.
- 2. Explain the basic elements of the healthcare policymaking process.
- 3. Explain the evolution of leadership theory and the importance of effective communication.
- 4. Explain the critical role of ethics in decision making as well as the major points of managerial ethics.
- 5. Understand sources of healthcare funding and how federal laws affect the healthcare environment.
- 6. Describe the root cause analysis and the assessment tools used in both management and clinical settings.
- 7. Explain the history of health information technology adoption in the United States.
