

COMPUTER INFORMATION SYSTEMS

The goal of the CIS program is to provide students with the technical skills and systems perspective necessary for entry-level positions in the computer and information industry. Students should not expect that they will necessarily meet the lower division requirements at specific colleges or universities. Students should consult the Transfer Information section of this catalog for specific transfer information.

Computer Information Systems offers certificate programs in more specific areas such as Web Design and Business Information Worker. CIS courses are designed to prepare students for entry-level positions in the computer information industry or to help business-oriented majors gain admission to a transfer institution.
